Berte prosím na vědomí, že se barvy v originální podobě mohou lišit od prezentovaných barev. Elektronická a tištěná podoba vzorníku není považována za plně spolehlivou prezentaci. Doporučujeme proto vybrané barvy porovnat se skutečnými vzorkovnicími.
Barevné odstíny uvedené ve vzorníku se vztahují k akrylátovým, silikon-silikátovým, silikonovým, silikátovým, silikoelastomerovým a elastomerovým omítkám a akrylátovým, silikonovým a silikátovým nátěrům.
* V případě silikátové barvy CT 54 nejsou tyto barvy k dispozici.

☀ Index odrazu světla / HBW (LRV)
HBW (LRV) – koeficient odrazu světla (procento viditelného záření odráženého od povrchu). LRV pokrývá rozsah viditelného světla.
TSR – celková odrazivost sluneční energie (procento slunečního záření odráženého od povrchu v celém rozsahu). Tento faktor se týká světelných vln v ultrafialovém, viditelném a infračerveném rozsahu.

Pro zajištění dlouhé životnosti fasády a zabránění nadměrnému zahřívání povrchu se doporučuje používat vrchní nátěry (omítky a barvy) u ETICS s hodnotou odrazu světla HBW ≥ 25 a celkovou hodnotou odrazu slunečních paprsků TSR ≥ 25. Jestliže je výběr odstínu fasády u jednoho z faktorů nižší než 25, kontaktujte technicko-poradenské oddělení a najdete řešení na míru.

Harmonické & Vybážen

Pro ty, kteří si chtějí odpočinout od ruchu světa, jsme vytvořili paletu harmonicky splývající s okolím. Najdete zde všechny odstíny zelené, béžové a bílé.

Berte prosím na vědomí, že se barvy v originální podobě mohou lišit od prezentovaných barev. Elektronická a tištěná podoba vzorníku není považována za plně spolehlivou prezentaci. Doporučujeme proto vybrané barvy porovnat se skutečnými vzorkovnicí.

Barvené odstíny uvedené ve vzorníku se vztahují k akrylátovým, silikon-silikátovým, silikonovým, silikátovým, silikaelastomerovým a elastomerovým omítkám a akrylátovým, silikonovým a silikátovým nátěrům.

* V případě silikátové barvy CT 54 nejsou tyto barvy k dispozici.

☀️ Index odrazu světla / HBW (LRV)

HBW (LRV) – koeficient odrazu světla (procento viditelného záření odráženého od povrchu). LRV pokrývá rozsah viditelného světla.

TSR – celková odrazivost sluneční energie (procento slunečního záření odráženého od povrchu v celém rozsahu). Tento faktor se týká světelných vln v ultrafialovém, viditelném a infračerveném rozsahu.

Pro zajištění dlouhé životnosti fasády a zabránění nadměrnému zahřívání povrchu se doporučuje používat vrchní nátěry (omítky a barvy) u ETICS s hodnotou odrazu světla HBW ≥ 25 a celkovou hodnotou odrazu slunečních paprsků TSR ≥ 25 . Jestliže je výběr odstínu fasády u jednoho z faktorů nižší než 25, kontaktujte technicko-poradenské oddělení a najdete řešení na míru.
